## Community Action Month

Through hard work and with the assistance of Youth@Work, Annamarie gained employment in her desired field of Physical Therapy.

## ANNAMARIE'S STORY

Annamarie started the Youth@Work program at CSET in early August of 2019. She had experienced difficulty finding employment on her own despite her Medical Assistant Certificate. Through the work readiness workshops, she developed a résumé. After months of hard work, Annamarie completed her workshops in late January of 2020. Soon after, Annamarie interviewed for and received an internship opportunity at Dash Therapy. After her initial 200 hours of training as an office aide, her employer requested additional hours

to train Annamarie to assist Physical Therapists. Annamarie continued to train with Dash Therapy through the COVID-19 pandemic. She was officially hired as a Front Office Medical Assistant with Dash Therapy in May of 2020. Annamarie is grateful for the supportive services CSET provided her. Having grown up in poverty, this job has given her the ability to care for her mother and help with her expenses. Annamarie recommends CSET's services to family and friends every chance she gets..
